

Template for Replicated CDs/DVDs

White printable surface

-  Overall artwork/canvas size 120mm x 120mm
-  Fringe area - avoid placing text or important graphics here
-  Safe area - place all text and important graphics here

Overall disc diameter is 120mm but the printable area extends from 116mm diameter down to 18mm diameter. Do not cut out a central hole in your artwork; and you do not need to make your artwork circular, a 120 x 120mm square will be OK - both inner and outer circles will be created automatically during printing. Make sure any background colour or image extends the full width of the canvas, but keep any text or important images within the safe area.
